TECHNICAL SKILLS

Python · Flask · SQL · PostgreSQL · SQLite · JavaScript · TypeScript · HTML/CSS · Java · C++ · Kotlin · Lua

TOOLS

Git/GitHub · FFmpeg · Playwright · Power BI · WordPress · Cloudflare/DNS · Microsoft 365 · Networks/VMs

LANGUAGES

Portuguese	NATIVE
English	INTERMEDIATE
Spanish	BASIC

COURSES

IABOT - My Robot School
2025

Introduction to Programming
ADA · 2023

SUMMARY

Software Engineering student at UFMS and IT Analyst at MUPAN, with hands-on experience in backend development using Python/Flask, process automation, and Artificial Intelligence applications. Experience building internal systems, API integrations, and tools for processing and organizing large volumes of data and files. Professional interest in Backend, Python, automation, and applied AI.

PROFESSIONAL EXPERIENCE

IT Analyst
Apr/2026 - Present

MUPAN - Mulheres e Lideranças pelas Áreas Úmidas / Wetlands International Brasil

- MUPAN Database - developed an internal web application with Flask, SQLite and Jinja2 for institutional data management, including role-based authentication, CRUD operations, file uploads, global search, and trash/restore features.
- AI Video Renamer - built a Python desktop tool using multimodal AI to analyze and standardize institutional videos through Whisper transcription, frame analysis, metadata, GPS geolocation, multiple AI API management, and a manual review queue. Tested on a real batch of 170 videos, processing 28-57 videos/hour.
- GEBIODASH - debugged and improved a TypeScript registration system, including Resend API email integration, validation fixes, and Excel/CSV export corrections.
- File Organization - created a Python tool to clean up and reorganize around 16,000 duplicated or poorly named files stored in OneDrive/SharePoint, generating Excel reports for batch review.
- IT Support - handled network and performance troubleshooting, VM administration, institutional email deliverability through Cloudflare/DNS, and support for Power BI, WordPress, and Outlook.

Robotics and Programming Tutor
2025 - Aug/2025

MyRobot

Led workshops and introductory robotics/programming projects for children, teenagers, and adults, teaching computational logic, robotic kit assembly, and supporting educational technology projects.

Volunteer
2024

FAPEC - UFMS

Supported academic events with logistics, reception, communication, and general institutional assistance.

EDUCATION

B.Sc. in Software Engineering
2023 - 2026

Federal University of Mato Grosso do Sul (UFMS)

High School

Colégio Militar de Campo Grande - Honor Guard member
